

Beat Rising Costs and Hassles of Travel

Easy, Cost-Effective Conferencing Services

Time and Cost Comparison: Travel vs. Conferencing

See box below for chart detail

Save Money and Shrink Your Environmental Footprint with Audio and Web Conferencing

Conferencing is the ideal antidote to a slow economy, rising costs and an environmental emergency.

- Enable quicker, more collaborative decision making
- Meet with customers, employees and colleagues more effectively
- Avoid the expense, hassles and environmental impact associated with travel
- Share information faster and better with streaming audio and video, question/answer functionality, polls, web tours and more

Customize a Solution

Whether your business is small, medium or large, you can take advantage of our standard or customized services. Our global platforms, in-country language services and exceptional customer service representatives set us apart.

The FAA says transportation makes up more than 55% of total national greenhouse gas emissions.

Four people located and attending a six-hour meeting in the U.S. would create an estimated carbon output of 4,851 lbs (2,200 kg). One would need to plant 12 trees to help offset these emissions. The monetary and time cost is just as great. See the chart above for more staggering figures.*
